

Infrastructure Solutions

ICT, data centres, power supply
and office renovations

About Us

We are a leading provider of solutions for trade facilitation, powered by world-class technology including artificial intelligence. We develop new-generation IT systems, coupled with efficient trade reforms, that take trade and customs processes to the next level for the benefit of the global trading community.

Investing in employees, delivering value to customers, dealing ethically with suppliers and supporting outside communities.

We're International

Infrastructure Solutions

Webb Fontaine provides the necessary infrastructure to support the automation of Customs and trade procedures, including information and communication technology (ICT), data centres, power supply and office renovation.

Security and data integrity are guaranteed through compliance with safety standards and redundancy.
Communication and operations are improved, as well as the global image of the country.

How It Works

Our Infrastructure Solutions provide you with modern technology to ensure that your IT system works properly.

ICT and power supply: we provide procurement and configuration of specialised equipment, as well as design and implement telecoms infrastructure to support high-technology operations. From radio and satellite communications through virtual private networks (VPNs), to designing and building office facilities, we create the supporting infrastructure to modernise your ICT environment.

Data centres: we build data centres for trade, featuring high-availability, redundancy and virtualised servers.

Office renovation: we assist to bring your premises up to speed with high-quality international standards, including safety norms, to support your operations. Equipment includes fire detection, fireproof rooms to protect sensitive equipment such as servers, solar energy, satellite communications, and more.

Webb Infrastructure

Ensures your IT system works properly, using state-of-the-art material and infrastructure, including up-to-speed connectivity and high-availability, especially in environments that previously did not have the capacity.

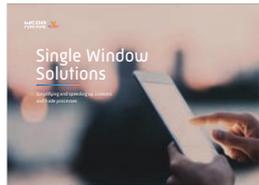

**“Powering Governments
to be leaders in the future of trade.”**
Didier Reymond, CEO

Other Solutions

Our unique suite of **Customs Solutions** automate the entire customs process from pre-clearance to post-clearance. Processing all Customs documents and procedures digitally through a single interface.

Our exclusive **Single Window solutions** interconnect all stakeholders involved in foreign trade and allows them to perform trade procedures on a single platform. Simplifying and speeding up customs and trade processes for both traders and government agents.

Our **Port Solutions** provide an interface between port authorities, terminal operators and Customs, offering a comprehensive set of features designed for the facilitation of port logistics operations.

Success Stories

Discover all of our success stories on our website, or scan the QR code for a quick flight around the globe.
